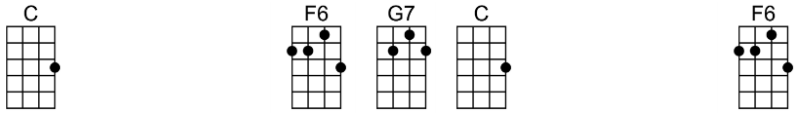
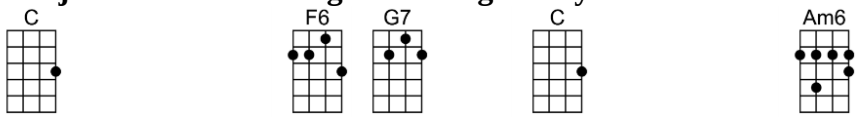
Verse:



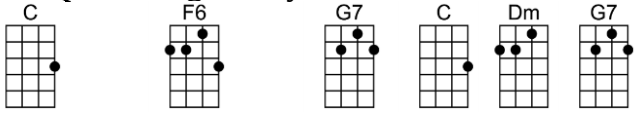
Be-fore you leave these portals, to meet less fortunate mortals

There's just one final message I would give to you

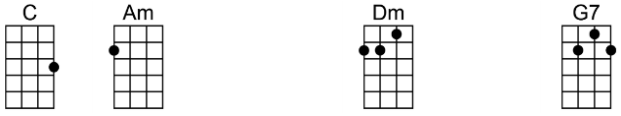


You all have learned re-liance on the sacred teachings of science

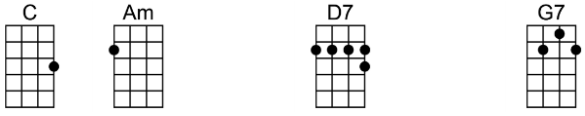
So I hope, through life, you never will de-cline, in spite of Philis-tine de-fiance,



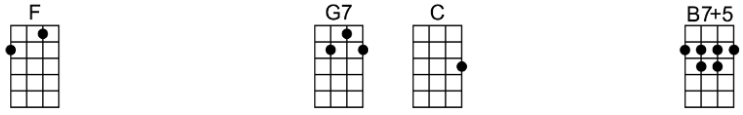
To do what all good scientists do



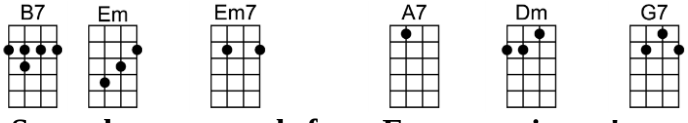
Ex-periment, make it your motto day and night



Ex-periment, and it will lead you to the light

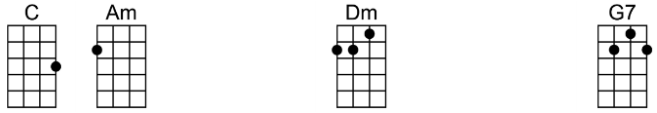


The apple on the top of the tree is never too high to a-chieve

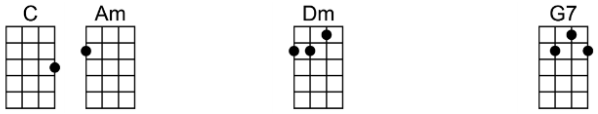


So take an example from Eve-ex-periment!

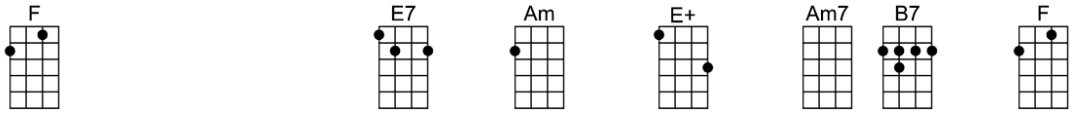
p.2. Experiment



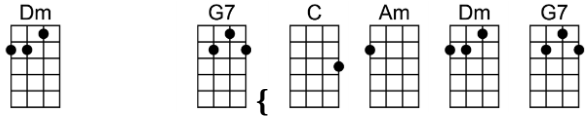
Be curious, though inter-fering friends may frown



Get furious at each at-tempt to hold you down



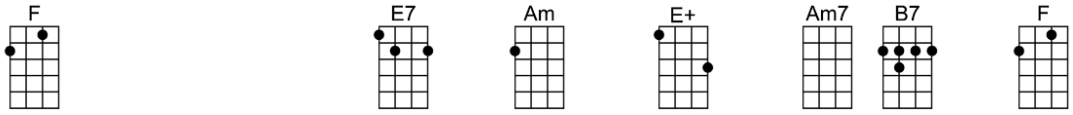
If this advice you always em-ploy, the future can offer you infinite joy and merriment



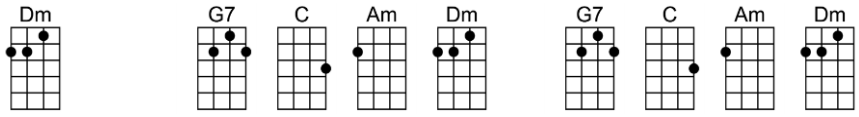
{ } X2

Ex-periment, and you'll see

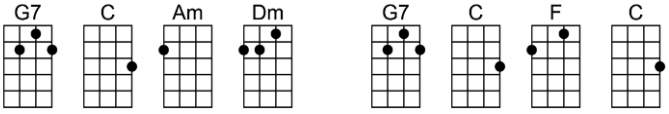
Interlude: First 2 lines



If this advice you always em-ploy, the future can offer you infinite joy and merriment



Ex-periment, and you'll see and you'll see



And you'll see yes, you'll see
